

Jan Dobrzański
Polish & European patent attorney at AOMB Polska sp. z o.o.

I entered the IP protection field more than 20 years ago. During this time, I have been working for large pharma and energy companies, being involved in a number of patent nullity and infringement cases, including a few high-profile ones. As a part of multinational teams of lawyers, patent attorneys and scientists I have learned how to effectively cooperate and share experience.

Another important area of my professional activity as a Polish and European patent attorney consists of supporting individual inventors, scientists from universities and research institutes as well as a growing number of Polish SMEs in obtaining and enforcing their own patents, developing IP strategy, and navigating through the European patent landscape.

In 2015 I joined AOMB Polska. Since January 2020 am a Head of Life Science Team at AOMB Polska sp. z o.o. In 2019, and again in 2020, 2021, 2022 and 2023 together with my colleagues we were proud to find out that we had been mentioned among the top Polish IP firms in the IAM Patent 1000 ranking (<https://www.iam-media.com/rankings/patent-1000/profile/person/ian-dobrzanski>).

I am also a registered professional representative before the European Union Intellectual Property Office and the Unified Patent Court.

My professional activity involves performing all types of prior art searches [patentability, FTO, landscaping]; drafting and prosecuting Polish and European patent applications; handling opposition and appeal proceedings before the Polish and European Patent Office, as well as Polish administrative courts; assisting clients in infringement court proceedings; counselling on industrial property matters, including combining patenting strategies with other forms of IP protection; conducting IP trainings and managing the Life Sciences Team in its daily operation

Main fields of technology: chemistry & chemical technology, biotech & pharma, material sciences, mechanics

I am a member of Polish Chamber of Patent Attorneys, European Patent Institute and AIPPI (International Association for the Protection of Intellectual Property)
